

FOCUS ON MINI-SPLIT/MULTI-SPLIT HEAT PUMPS

Save Energy and Stay Comfortable Year-Round With Mini-Split/Multi-Split Heat Pumps

Did you know that heating and cooling cost the average homeowner more than \$900 a year*—nearly half the home’s total energy bill? ENERGY STAR® certified mini-split/multi-split heat pumps generate both heating and cooling from a single device and distribute that air more efficiently than traditional heating systems and air conditioners. FOCUS ON ENERGY® has partnered with participating contractors to provide **instant discounts** starting at \$300 on these high-efficiency products.

Is a Mini-Split/Multi-Split Heat Pump Right for My Home?

You should consider a mini-split/multi-split heat pump if you:

- Have high electric heating costs.
- Live in an older home with no ductwork.
- Are planning an addition or outbuilding where extending ductwork is not feasible.
- Have rooms that are not regularly occupied.

Why Should I Upgrade to a Mini-Split/Multi-Split Heat Pump?

Serious energy savings

Mini-split/multi-split heat pumps can reduce heating costs by up to 50% and cooling costs by 30%.*

Increased control

Each indoor unit can provide customized heating and cooling, adjustable through wall consoles, with remote controls, and on your smart device.

Getting Your Discount Is Easy

All you need to do is purchase qualifying equipment from a participating contractor, and we will take care of the rest. Talk to your contractor for additional details.
