# 2022 INSULATION AND AIR SEALING REBATE APPLICATION

## FOR SINGLE-FAMILY, MULTIFAMILY, AND CONDOS

Scan to go to online application.

#### Step 1: Confirm Eligibility.

- Confirm that at least 50% of home heating comes from a participating utility.
- Confirm rebate level. If household income is at or below the amounts in the income table in Section 4, customer may be eligible for higher incomequalified rebates. If you think you may qualify, visit focusonenergy.com/income for more information.

Step 2: Complete Insulation and Air Sealing Projects.

### **Step 3: Trade Ally Contractor Completes Application.**

The insulation and/or air sealing project must be completed in 2022. All applications must be submitted to FOCUS ON ENERGY® within 60 days of project completion. Focus on Energy rebates are limited and are subject to change without notice.

Visit focusonenergy.com/terms for terms and conditions.

#### **Required documentation:**

- Final **itemized** invoice to customer (payee must match the billing section on invoice).
- · Combustion safety/ventilation notification (if applicable).
- Focus on Energy/utility/housing authority income-eligible approval letter (if applicable).

Incomplete or missing information will delay processing and may result in denial.

# Single-Family Home (1–3 Units) Installation Requirements

Must be installed by a participating insulation and/or air sealing Trade Ally. All improvements must follow Materials & Installation (M&I) Standards. Only one improvement per category qualifies for a rebate. Rebates cannot exceed installed cost. For a complete list of Terms, Conditions and Requirements, visit focusonenergy.com/wholehome.

### **ENERGY STAR® Certified Air Sealing**

- · Pre and post blower door testing required.
- · Home Assessment Report, which meets Home Performance with ENERGY STAR requirements, to be provided to the homeowner.
- · Must be part of a larger project that includes the attic insulation improvement or the wall/framed floor insulation improvement.

#### Attic Insulation

- · At least 600 square feet of attic area must be improved.
  - · Open cavity/attic floor with an effective insulation level of R-19 or less; improved to R-38 or greater.
  - · Closed cavity covered floor with an insulation level of R-0; improved to cavity filled with insulation.
- · Air sealing installed to M&I standards (see page 20, bullet points number one and four).
- · Knee wall improvement area can be included to meet the 600 square feet requirement.

#### **Foundation Insulation**

- · At least 50% of the total sill, foundation wall, or foundation ceiling area must be improved. Area must include connected crawlspaces.
- · An insulation level of R-0 insulation; improved to R-5 or greater.
- · Must be part of a larger project that includes the attic insulation improvement or the wall/framed floor insulation improvement.

#### **Wall/Framed Floor Insulation**

- · At least 800 square feet of exterior wall must be improved: wall cavity with an insulation level of R-0; improved to cavity filled with insulation.
- At least 400 square feet of framed floor must be improved: framed floor with an insulation of R-19 or less; improved to cavity filled with insulation.

#### **Duct Sealing**

- · Not applicable to ductwork in conditioned space (e.g., basement or unvented crawlspace).
- · Must be non-sealed, non-insulated ductwork outside the conditioned space; improved to be sealed and insulated to a minimum R-8.
- · Must be part of a larger project that includes the attic insulation improvement or the wall/framed floor insulation improvement.

# Multifamily Home (4+ Units) Installation Requirements

Must be installed by a participating insulation and/or air sealing Trade Ally. All improvements must follow Materials & Installation (M&I) Standards. Only one improvement per category qualifies for a rebate. Rebates cannot exceed installed cost. For a complete list of terms, conditions, and requirements, visit focusonenergy.com/wholehome.

#### **General Requirements**

- If more than one heating equipment type exists in the building, please provide all the heating types, their efficiencies, and the approximate areas for each heating type.
- · For heating efficiency, provide the approximate heating efficiency and units (80% thermal efficiency, 3.0 COP, etc.).
- If more than one cooling equipment type exists in the building please provide all the cooling types, their efficiencies, and the approximate areas for each cooling type.
- · For cooling efficiency, provide approximate cooling efficiency and units (10 EER, 14 SEER, etc.).
- · Rebate is not to exceed project cost.
- · Insulation and air sealing improvements must be installed by a participating Trade Ally.

### Air Sealing

- · Air sealing must be completed at same time as attic insulation.
- · Air sealing shall be performed in accordance with building science industry best practices and in compliance with local building codes.

#### **Attic Insulation**

- Eligible insulation types include but are not limited to: fiberglass batts, spray foam, loose fill cellulose, or other material providing that it meets local and state building codes.
- · Only attic area above living space (excludes laundry, storage, garage, etc.) can receive rebate.
- Existing attic insulation must be as specified in the measure description: ≤ R-11, between R-12 and R-19, or between R-20 and R-38 (excluding assembly section).
- Existing insulation or R-19 or less must be improved to R38 or greater. Existing insulation of R-20 to R-38 must be improved to at least R-49.
- · Square feet of insulation should be clearly listed and labeled with area type (attic or wall) on the invoice.

#### Wall Insulation

- Eligible insulation types include but are not limited to: fiberglass, spray foam, cellulose, or other material providing that it meets local and state building codes.
- · Only exterior walls in contact with living space (excludes laundry, storage, garage, etc.) can receive rebate.
- · Existing wall insulation must be R-5 or less.
- · Additional wall insulation must bring walls up to at least R-20 of cavity insulation.
- · The use of R-13 cavity insulation plus R-5 insulated sheathing is considered equivalent to cavity insulation of R-20.
- · Square feet of insulation should be clearly listed and labeled with area type (attic or wall) on the invoice.
