

2022 FOCUS ON ENERGY® PROGRAM UPDATES

Residential

- New prescriptive measures
 - Boilers (90%-94% AFUE, natural gas)
 - Standard incentive: \$300
 - Income-qualified incentive: \$400
 - Combination Boilers (90%-94% AFUE, natural gas)
 - Standard incentive: \$400
 - Income-qualified incentive: \$550
- Prescriptive incentive changes
 - Combination Boilers ($\geq 95\%$ AFUE, natural gas)
 - Income-qualified incentive: \$700
- Free energy saving packs
 - Eligibility based on calendar year
 - Packs with advanced power strip return in 2022
- Smart thermostat \$25 bonus extended through Q1 2022
- Natural gas storage type water heater \$50 instant discount at select retailers

Business

- Prescriptive incentive changes
 - Increased incentives
 - Boilers ($\geq 85\%$ thermal efficiency, $\geq 90\%$ AFUE, $\geq 90\%$ thermal efficiency)
 - Linkageless boiler controls
 - HVAC and process system steam trap repair/replacement
 - ECM evaporator fan motor for cooler and freezer cases
 - Decreased incentives on select screw-in LED omnidirectional and decorative lamp
- Prescriptive measure changes
 - Eliminated
 - Residential-type water heaters for businesses (Now eligible through Midstream.)
 - Exterior omnidirectional, decorative, and directional LED lamps for New Construction
 - Added
 - Fitness centers as an eligible facility type for high use commercial water heaters
 - Networked Lighting Controls option for New Construction lighting
- Multifamily New Construction
 - Prescriptive New Construction incentives for most equipment must go through the [Multifamily Product and Equipment Performance \(PEP\)](#) offering

Midstream

- Natural gas water heater measures added
 - Qualified Product List (QPL) based on ENERGY STAR®
 - Storage units, \$50 wholesale incentive
 - Tankless units, \$200 incentive
- Expansion of ductless heat pump eligibility
 - Must still be included on AHRI 'Variable-Speed Mini-Split and Multi-Split Heat Pumps' directory though previously non-qualifying "Indoor Type" systems now qualify. The full list of "Indoor Type" classifications are:
 - Mini-Splits
 - Ducted Indoor Units
 - Mixed Ducted and Non-Ducted Indoor Units
 - Non-Ducted Indoor Units
 - Specific

Renewables

- Renewable Energy Competitive Incentive Program (RECIP)
 - Transition to custom incentive structure effective January 1, 2022
 - Established incentive rates - \$125/kW, \$0.10/kWh, \$1.25/Therm
 - Maximum payback of 20 years
 - Limited to 50% of project cost
 - Incentive cap of \$300,000 per project
 - Applicable to biogas, biomass, wind, solar thermal
- Special Sector Solar PV
 - Nonprofits, schools, government, and Native American tribes and nations
 - Incentive up to \$81,000

Training

- Live instructor-led webinars to continue in 2022
- In-person sessions targeted
 - Advanced Network Lighting Controls with Design Lights Consortium – May
 - Building Automation Systems with the University of Wisconsin - Madison - September
 - Industrial Refrigeration with the University of Wisconsin - Madison – November
- Learning Management System (LMS) – On-demand (24/7) trainings available
- Building Operator Certification (BOC) begins late Q1
